Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/809,912

Applicant(s)

HOSOKAWA ET AL.

Examiner

Hoa V. Le

Art Unit

1752

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 October 2005.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 21-23 and 25-27 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
5) ☐ Claim(s) _____ is/are allowed.
6) ☒ Claim(s) 21-23 and 25-27 is/are rejected.
7) ☐ Claim(s) _____ is/are objected to.
8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 09/21&11/02/05
4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other: _____

This is in response to Papers filed on 19 October 2005.

- I. Applicants' prior art submissions filed on 21 September and 02 November 2005 have been considered. The foreign references and their abstracts are cumulative. No new applied reference is added in this Office action because it would not properly make the Office action to be FINAL and since the applied references remain pertinent.
- II. The prior art submission filed on 04 June 2004 is also considered to the extent to the English language translation of the Foreign Office Action only since it shows that the teachings and suggestions in the applied Japanese patents are relevant and applied to the claimed invention as submitted. Therefore, English language translations of pertinent portions or English language equivalents of the applied Japanese patents should have been timely provided for a proper consideration and examination.

Applicants state that they will provide a pertinent portion of the applied foreign references in English language on 19 October 2005 being acknowledged.

III. Claims 21-23, 25 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsuoka et al (5,384,236).

Matsuoka et al disclose and teach a method for using a compound being reasonably read within the general formula (C) as claimed in a silver halide color photographic material and rapidly processing the material based on the light fastness property of the compound in a red sensitive layer. The layer contains tabular silver halide grains having an aspect ratio of 8. Please see the whole disclosure of the applied reference, especially at col.2:6 and 16-8:2, compounds (1) to (57), 56:39-42, Table B on cols.63 and 64, 65:50-60 and 68:9-11.

Matsuoka et al do not specify the properties with respect to “Hammett...value...to 1.0” as that in claim 21, “change a film...to 3.0” as that in claim 22, “pKa value...to 8.4” as that in claim 23 and “reactivity...to 1.0” as that in the original claim 24, now in claim 21. Since they are all related to the properties of the materials, (1) it is reasonable to consider inherent in the absence of a convincing evidence to the contrary and (2) it is allowed by the court of law to request and required applicants to show or provide a convincing evidence to the contrary in accordance with the authority stated in re Schreiber, 44 USPQ2d 1429.

Art Unit: 1752

Since Matsuoka et al are reasonably disclosed and taught the claimed embodiments, the above claims are found to be anticipated by Matsuoka et al.

Applicant's arguments filed 19 October 2005 have been fully considered but they are not persuasive.

The arguments with respect to the property of a claimed functional property in the original claim 24, now in claim 21 have and are given a little to no patentable value since they are not factual evidence as required by law as clearly pointed out and set forth on the record. A claim would have no value if someone later show it.

IV. Claims 21-23, 25 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagaoka et al (5,460,929).

Nagaoka et al disclose and teach a method for using a compound being reasonably read within the general formula (C) as claimed in a silver halide color photographic material and rapidly processing the material based on the light fastness property of the compound in a red sensitive layer. The layer contains tabular silver halide grains having an aspect ratio of 8. Please see the whole disclosure of the applied reference, especially at col.1:8-9, 9:14 to 14:67,

Art Unit: 1752

compounds (1) to (48), "Emulsion D" on col.176:26 and on col.179 with respect to the top Table on left column of "Emulsion" from C then to D and on col.182 with Table 84 with "6th" layer.

Nagaoka et al do not specify the properties with respect to "change a film...to 3.0" as that in claim 22, "pKa value...to 8.4" as that in claim 23 and "reactivity...to 1.0" as that in the original claim 24, now in claim 21. Since they are all related to the properties of the materials, (1) it is reasonable to consider inherent in the absence of a convincing evidence to the contrary and (2) it is allowed by the court of law to request and required applicants to show or provide a convincing evidence to the contrary in accordance with the authority stated in *In re Schreiber*, 44 USPQ2d 1429.

Since Nagaoka et al are reasonably disclosed and taught the claimed embodiments, the above claims are found to be anticipated by Nagaoka et al.

Applicant's arguments filed 19 October 2005 have been fully considered but they are not persuasive.

The arguments with respect to the property of a claimed functional property in the original claim 24, now in claim 21 have and are given a little to no patentable value since they are not factual evidence as required by law as clearly

Art Unit: 1752

pointed out and set forth on the record. A claim would have no value if someone later show it.

V. Claims 21-23, 25 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Mihayashi et al (5,543,282).

Mihayashi et al disclose and teach a method for using a compound being reasonably read within the general formula (C) as claimed in a silver halide color photographic material and rapidly processing the material based on the light fastness property of the compound in a red sensitive layer. The layer contains tabular silver halide grains having an aspect ratio of 8. Please see the whole disclosure of the applied reference, especially at col.1:13:6, 3:25 to 10:22, compounds (1) to (52), 38:51-52, col.68 with respect Emulsion 5 on Table 1 and Samples 116 and 117 on Table 3 at cols. 87 and 88, 89:34, Table 5 with "Emulsion" "7-1" and "8-1" on cols. 95 and 96, Table 6 with "Sample" "303", "304", "307", "308", "311" and 312" on cols. 97 and 98.

Mihayashi et al do not specify the properties with respect to "change a film...to 3.0" as that in claim 22, "pKa value...to 8.4" as that in claim 23 and "reactivity...to 1.0" as that in the original claim 24, now in claim 21. Since they

Art Unit: 1752

are all related to the properties of the materials, (1) it is reasonable to consider inherent in the absence of a convincing evidence to the contrary and (2) it is allowed by the court of law to request and required applicants to show or provide a convincing evidence to the contrary in accordance with the authority stated in *In re Schreiber*, 44 USPQ2d 1429.

Since Mihayashi et al are reasonably disclosed and taught the claimed embodiments, the above claims are found to be anticipated by Mihayashi et al.

Applicant's arguments filed 19 October 2005 have been fully considered but they are not persuasive.

The arguments with respect to the property of a claimed functional property in the original claim 24, now in claim 21 have and are given a little to no patentable value since they are not factual evidence as required by law as clearly pointed out and set forth on the record. A claim would have no value if someone later show it.

VI. The above applied references are insufficient to applied against claim 26. However, the teachings and suggestions in the prior art submission filed on 04 June 2004 may be sufficient to applied against it as that on the record in the

Art Unit: 1752

Foreign Office Action as submitted. Applicants have not early and timely provide English language translations of pertinent portions or English language equivalents of the applied Japanese patents should have been timely provided for a proper consideration and examination. For the record, claim 26 (1) is not rejected over the above references (2) may be provisionally rejected over the teachings and suggestions in the applied Japanese patents as that on the record in the Foreign Office Action. English language translations of pertinent portions or English language equivalents of the applied Japanese patents

VII. Claim 26 is provisionally rejected under 35 U.S.C. 103(a) as being unpatentable over the teachings and suggestions of one or more of the Japanese Patents with respect to JP 2000-181002, JP 11-119364, JP 51-59943, JP 54-32552 and JP 2001-133931 for the reasons as stated in the Foreign Office Action as submitted. Accordingly, English language translations of pertinent portions or English language equivalents of the applied Japanese patents must be timely provided before a brief on appeal is filed. Otherwise, the appeal will not be considered and is dismissed.

Applicants state that they will provide a pertinent portion of the applied foreign references in English language on 19 October 2005 being acknowledged.

VIII. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

IX. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa V. Le whose telephone number is 571-272-1332.

The examiner can normally be reached from 6:30 AM to 4:30 PM on Monday through Thursday and about the same time of most Friday.

Art Unit: 1752

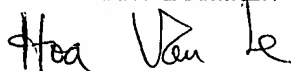

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia Kelly can be reached on 571-272-1526.

Applicants may file a paper by (1) fax with a central facsimile receiving number 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
